Crop Prospects Drive Sugar Securities Upward.

TRADING OPENS UP BRISKLY

Figures of Transfers—Dividends. Other Stocks—Doubling—Ookala. Honolulu—Waimea.

Trade in sugar securities yesterday was brisk, but without any more features or heavier transfers than on the corresponding day of last week. The final, official consummation of annexation does not appear to have greatly affected the trading or figures. The change within the past month has not been very great. Ever since the passage of the Joint Resolution by the senate there has been an upward tendency, but this has been due more perhaps to crop prospects than to the assurance that Annexation had arrived, the political fact having been accepted some time before.

The one outside stock that is attracting more attention than others these days is that of the Oahu Railway & Land Company, which has advanced from \$65 to \$75.

Hawaiian Electric is strong at \$29.4. Pepeekeo is firm at \$215. Mutual Telephone, par \$10, is still \$14.

People's Ice, none on the market. The last sale was at \$115.

A large block of Kahuku was sold yesterday for \$120.

Quite a quantity of Oahu assessable readily commanded \$101 yesterday, \$75 being paid up. When the market closed \$105 was being asked for this stock.

Hart & Co., Ltd., par \$10, was sold in a small block at \$10.50.

Kipahulu, paying a dividend of 5 per cent on Saturday last, sold for \$110 yesterday, with very little on the market.

Ewa within the last ten days has sold at from \$260 to \$275. There is not much movement in this stock, as the holders do not care to part with it.

There is a demand for Honoum, but only a little can be had. The ruling figure is \$300.

For Pioneer Mill, \$310 is offered, with no sellers.

No sales of Makawell reported, but the price is given as \$157.50.

A dividend of 10 per cent was paid by Honokaa yesterday. Before that the stock was selling for \$375. The prospect of the doubling of the capitalization has run Honokaa up to where \$400 is asked.

In all the above quotations where not otherwise specified, the par is \$100.

The reorganization or recapitalization of Ookala has been practically carried to a successful conclusion by Harry Armitage. Everything will be closed up finally on the return from the States of J. F. Morgan, who will arrive home again next week. The change in Ookala is increase of capital from \$200,000 to \$500,000.

There has been considerable inquiry concerning the new Honolulu plantation. This is also called Halawa. Jas. A. Lew, an experienced sugar and coffee plantation man, is to be manager. He is already on the ground, has put up a few buildings and will proceed at once with the development of the property lately acquired by himself and associates. The location is an admirable one, with the railroad handy and the assurance of a considerable natural supply of water, as well as that to come from artesian sources. The soil is the same as that of the Ewa and Oahu plantations. In fact the new plantation's fields will be about those of Oahu. Mr. Lew has shown himself so far an active and energetic man, having in a remarkably short time carried out the organization of the new company.

McCandless Bros. have finished twenty artesian wells on Oahu plantation and started yesterday on the twenty-first.

H. W. Schmidt and Sons and Castle & Cooke have repurchased the stock of the Waimea plantation on Kauai and will hereafter operate it as an exclusively local enterprise. Heretofore most of the stock has been owned in Germany and the plantation was controlled by F. A. Schaefer & Co. Castle & Cooke become the new agents. The capital stock under the new arrangement will be about \$150,000.

Waimea plantation was started fourteen years ago. Senator Schmidt was one of the original owners. It has always been good property and the estate was always worth more than the capitalization, \$70,000. If any of the new stock should be offered for sale it will be disposed of on the local market.

Capt. Robert Parker and family are going to Koolau for a week on account of the former's health.

WHARF AND WAVE.

Mr. Hagerup is acting purser of the steamer Kaula in place of Mr. Piltz on sick leave.

The bark Nuanu, of Honolulu, was receiving extensive repairs to spars, at New York July 26th.

The barkentine W. H. Dimond sailed from San Francisco Aug. 5th with a general cargo for this port.

The cruiser Philadelphia is coaling, having as lighters the two steam scows and the schooner Mol Wahine.

The steamer Claudine is being cleaned on the railway having arrived Saturday a day ahead of schedule time for that purpose.

Another returned Klondiker is Second Officer Olsen of the troopship Charles Nelson who was formerly mate of the steamer Mauna Loa and left that berth last spring to make his fortune in the Northern gold fields.

The officers of the troopship Charles Nelson are Captain Anderson, First Officer Winkle, Second Officer Olsen, Purser Tucker and Chief Engineer Cloak. There is a crew of 23 men. The Nelson will commence coaling at Oceanic dock probably today.

The Hawaiian ship Helen Brewer, at Shanghai, July 22, from New York, was in collision with French cruiser Jean Bart while at anchor. The Brewer was leaking badly, and fore compartment full of water. The Jean Bart lost funnel, and is otherwise damaged. The Brewer will discharge and dock for survey.

The schooner Malolo, recently built in San Francisco by Captain Turner, of Honolulu, is now fitting out for these islands, where she will engage in the fishing industry. She is fitted with a number of tanks, in which the fish can be kept alive for an indefinite period. The Malolo is a trim-looking craft of about thirty tons.

U. S. Branch Hydrographic Office, San Francisco, Cal.

By communicating with the Branch Hydrographic Office in San Francisco, captains of vessels who will co-operate with the Hydrographic Office by recording the meteorological observations suggested by the office, can have forwarded to them at any desired port, and free of expense, the monthly pilot charts of the North Pacific Ocean and the latest information regarding the dangers to navigation in the waters which they frequent.

Mariners are requested to report to the office dangers discovered, or any other information which can be utilized for correcting charts or sailing directions, or in the publication of the pilot charts of the North Pacific.

CITIZENS' GUARD.

It May be the Nucleus for a Naval Reserve.

For the present the Citizens Guard organization will stand as a quasi support to the police department. With annexation its real mission and work departed, and men from it will in future only be called upon to assist the police in case of riots, strikes or disturbances of more than ordinary proportions. Many of the younger men in the organization are leaving to join the military forces. Captain McStocker stated yesterday that there was no objection to this; in fact it was desirable that all healthy young men should enter the armed service of the United States in some way.

Captain McStocker is a firm advocate of a strong naval reserve for Honolulu, and will be one of the foremost promoters of such an organization. He said yesterday afternoon that the reserve would probably be established in the very near future. There are great hopes for that branch of the service here for the reason that island boys, as a general thing, are great seamen and are practically immune in the tropics.

We have used Chamberlain's Cough Remedy in our home for many years and bear cheerful testimony to its value as a medicine which should be in every family. In coughs and colds we have found it to be efficacious and in croup and whooping cough in children we deem it indispensable.—H. P. RITTER, 4127 Fairfax ave., St. Louis Mo.
